

Inner Light: The Dragon Within Book Review

Inner Light: The Dragon Within is the story of Michael, a boy who is looking for excitement in his life, until excitement ends up finding him. Welcome to the world of dragons, dark wizards, amulets of power, danger, and non-stop action, as Michael discovers who he is and what role he plays in saving the future of mankind. Fast-paced and often humorous in most parts, Metha Metharom takes you to a world where you want to get lost in.

Metha Metharom is a new emerging author with an incredible talent. His other works include the "Alexander Kai" series, "Love Stone" and "Tales from the Shore", to name only a few. Having read a couple of his stories already ("Inner Light" being one of them), I have come to notice how no two stories are the same, and he uses different writing methods to engage with his audience. For example, the sporadic, fast-paced writing style for this particular novel really demonstrates the action and excitement taking place in the narrative, allowing the reader "feel" the adrenalin rush that the characters in the novel would be experiencing, rather than just reading about it. Also, the loose descriptions of the characters themselves allow the reader to create his/her own interpretation of the characters' physical characteristics and personalities in his/her mind. In short, it would be accurate to say that no two readers would get the same interpretation from this novel, as there are a lot of "hidden" meanings that people can get from it.

Another interesting element in this novel is that it contained an interesting blend of fantasy and Japanese anime (without the graphics, of course). Such were the images that were going on in my mind when I was reading it.

Unfortunately, I would NOT recommend this book for children (there is a fair amount of course language contained in it), but it is definitely a worth-while read for teenagers and adults.
