“Creepy tale!

This is a really good story, set in a creepy castle, with lots of twists to keep you guessing. A young boy inherits a castle, but that's not all. He also inherits a house full of really weird characters. This is like one of those old movies, with lots of creaking doors, dark corridors, spiders' webs in the corners...lots and lots of atmosphere. At the end of every chapter, you've got to read on. I couldn't stop until it was over, and then I was really sorry and wanted it to carry on! This is a great book for everyone, no matter what your age! Go out and buy it. It's good!”

“Old-fashioned terror!

An old castle, monsters, creepy servants...the basic ingredients for a cracking tale! When Daniel inherits an old castle from his grandmother, he inherits a lot more besides! This story moves along extremely well, the tension mounting on every page. It reminded me of those old Hammer horrors that I used to love; such great atmosphere. And real shocks too. This is definitely a real page turner - you just have to know what's going to happen next. I loved it. It's for young adults, but this is really for anyone who likes thrills of any kind.”
