Imagine a not-too-distant-future when the population of the world is controlled by leaders who watch our every move, demand to know every detail of our lives, and forbid us from doing some of the very things that make us human.

Imagine if these leaders enforced this control "all for the good of the child," as the children lost their independence, childhood joys, memories, and history. Imagine if intelligent beings from faraway worlds had been watching us, watching how humans treated Earth and each other. And imagine what would happen if these aliens decided it was time to try to save humankind from itself, enlisting the help of a select group of children from around the world to try and achieve the most important mission of all.

Author Julie Hodgson has created a truly memorable, thrilling story that is sure to delight fans and capture imaginations with its messages of warning and of hope.
